Erase boundaries and collaborate with ease.

Voice over IP (VoIP)

Today, business happens anywhere and everywhere.

Keeping ahead of the competition means staying productive in more places. VoIP makes it possible with cloud-based communications that helps your teams collaborate, share ideas and make critical decisions on the fly—wherever your business takes them.

When organizations invest in connected work, the payoff is substantial.

- 78% of business leaders increased business agility/responsiveness.
- 68% of business leaders increased productivity.
- 31% of business leaders decreased operating costs.

But don’t choose just any VoIP provider.

Turn to a leader, Verizon. With years of expertise and competitive SLAs, we’ll make sure your mission-critical services are there when you need them.

- 5+ years as the overall leader in SIP trunking in North America
- 12+ years serving the VoIP needs of Fortune 1000 companies
- VoIP services available to 80% of U.S. businesses

Our U.S. mobile network offers the top overall performance, data performance, call performance, network reliability and network speed, according to RootMetrics®

Strong experience. Better technology.

We can help you:

- Control costs and boost efficiency.
- Make technology easier to use.
