SOLUTIONS BRIEF

Our solutions span the public and private spectrum and are delivered via one of the world's most connected IP networks and supported with leading security and managed services capabilities.

THE SKY’S THE LIMIT
Security and Cloud Professional Services for Federal Defense Agencies

Whether you’re looking to combat cyber threats, reduce unnecessary complexity, control costs, or develop private communications infrastructure, almost anything is possible when you take it to the cloud.

Verizon’s cloud computing solutions are flexible, able to meet even the most complex requirements of the United States Department of Defense. Verizon can help defense and intelligence agencies increase IT service flexibility and scalability, and realize cost efficiencies with reduced data center and server footprints. This enables the DoD to meet key directives outlined in both the Defense Efficiencies Initiative and Federal Data Center Consolidation Initiative (FDCCI).

Regardless of where you need to go on the cloud continuum, Verizon can help take you there. Our solutions span the public and private spectrum and are delivered via one of the world’s most connected IP networks and supported with leading security and managed services capabilities. We currently deliver and manage cloud and security services to many federal government customers, including those within the Department of Defense.

EXPERTISE THROUGHOUT THE CLOUD LIFECYCLE
Our Cloud and Security Professional Services experts are specialists in their field and many hold security clearances. From planning to design, implementation, operations and sustainment, we can help you confidently adopt a customized, flexible and powerful cloud solution.

Plan
• Data Discovery and Retention Assessment
• Server Consolidation Assessment
• Cost-Benefit Analysis
• Cloud Strategy Services
• Storage and Capacity Utilization Assessments
• Secure Data Center Consolidation

Design
• Secure CAC Application Enablement
• Address Data Retention Mandates
• Maximize Existing Infrastructure

Implement
• Hybrid Cloud Operations
• Virtualization Migration
• Cloud Application Migration
• Storage Integration
Verizon is a global leader in driving better business outcomes for mid-sized and large enterprises and government agencies. Verizon combines integrated communications and IT solutions, professional services expertise with high IQ global IP and mobility networks to enable businesses to securely access information, share content and communicate. Verizon is rapidly transforming to a cloud-based ‘everything-as-a-service’ delivery model that will put the power of enterprise-grade solutions within the reach of every business.

Verizon Communications Inc. (NYSE, NASDAQ:VZ), headquartered in New York, is a global leader in delivering broadband and other wireless and wireline communications services to mass market, business, government and wholesale customers. Verizon Wireless operates America’s most reliable wireless network, serving more than 93 million customers nationwide. Verizon also provides converged communications, information and entertainment services over America’s most advanced fiber-optic network, and delivers innovative, seamless business solutions to customers around the world. A Dow 30 company, Verizon employs a diverse workforce of more than 195,000 and last year generated consolidated revenues of $106.6 billion.
